ANTI MINE BOOT (AM-L)

ZEMAN AM-L AntiMine Boot is constructed to have the highest safety. Our construction methods are to utilize a Frame Build which allows for a stronger and safer bond of the upper leather of the boot with the safety antimine sole. The side Frame Build of the boot allows for the user's foot to be snugly fit to ensure that after excessive use, the sole and the upper leather of the boot do not separate. This construction method is the safest and latest boot technology. The AM-L boot was designed to meet the current general staff requirements of 35gm of explosives: Height of boots for size 42/8: 27.0 cm
Weight of boots for size 46/11: max. 2 900 g / pair
